SysInfoTools FAT Recovery is a small, user-friendly Windows utility that allows you to recover lost and damaged data from disk drives. The recovery program can scan the selected disk drive, and it will only display the files that can be restored. The software can perform various types of scanning, including zero-sector scanning, directory scanning, file system scanning, and partition scanning. Apart from this, you can also choose between several recovery modes, including the manual recovery mode and the advanced recovery mode. The tool is available for 32-bit versions of Windows OS including Windows 2000, Windows XP, Windows Vista, Windows 7, and Windows 8. The program's interface is very simple and easy to understand, and it will guide you through the entire process. If you are running the SysInfoTools FAT Recovery on Windows 8 or Vista, you may experience a problem installing the program. The reason for this is that the software requires a minimum of 512 Mb of RAM. However, if you have a 64-bit version of Windows OS installed on your PC, you will be able to run the program with ease.

(2 votes) System information program is almost like a command line to the computer and also it is very easy to read for beginners as it shows you what is going on with your computer when any task is running. Before I installed systeminfo I didn't know a few things about what's going on in my machine. I'm always looking for "The only program which provides you Linux system info.." :-). After installing systeminfo, I still don't know certain things about my system. Well, if you do not want to install this tool, there are some other system information programs that can do a better job of providing you the information. After all, you can always use command line, and some people might like to have this information "on the spot". 1. I'm not the biggest fan of the "System information.." screens I see on my Windows machine, and the "About this computer" screens on my Linux box. I get what's going on on my OS, but not what's going on in the hardware. 2. I like to keep
