## PDF Measure It

To create a macro to measure a distance, 1. select macro type in menu bar 2. select Distance or Angle or Distance&Angle, according to the types of measurements 3. select a reference and measure point 4. click Macro button to create the macro 5. Click on a selected reference to start the measurement 6. click on the selected measure point to end the measurement 7. click Macro button to create a new macro with the measurement 8. Repeat the steps from step 5. You can record your measurement macros to a new Excel workbook, and you can take your favorite macro's data to the Excel, or you can enter any Excel formulas into the measurement points to get the result. Macro text can be typed in the measurement point, or you can click on the Macro text button to show the Macro text in the measurement point. Measuring Distance&Angle is the same as Distance, you can also create macro for Angle and perform your favorite actions on the selected measure point or the referenced one. "Measure It" is a reliable PDF to text converter, conversion process can be performed in batch mode. You can define that how many pages are to be converted, if necessary, in the "Measure It" settings. After conversion, a PDF text file can be produced, along with the conversion progress and the details of the converted pages. Frequently Asked Questions Q: How can I get the tool help? A: Start measuring, press F1 to get the tool help and click for other functions. Q: How can I get the current measurement data for a PDF? A: Clicking on the "measure" button in the Tools toolbar will show you all measurement data and enable you to navigate to the specific measurement point. Q: How can I use my favorite macro for measurement? A: Click the "Macro text" button to show the current macro in the measurement point. Then, type the macro text in the blank space, and press the Enter key to run the macro. Q: Why doesn't "Measure it" convert all my PDF pages? A: Please make sure that you have selected all the pages to convert. Q: I converted all the PDF pages successfully, but my PDF pages are not the same size as before conversion, is there any problem? A: Yes, there are some PDF pages are not the same size after conversion, because "77a5ca646e
